Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This communication is in response to applicant's amendment filed July 8, 2005. Claims 1-197, 199-202, 205-212, 215, 217-218, 221, and 224-240 have been canceled. Claims 198, 203-204, 213-214, 216, 219, 220, and 222-223 are pending in this case.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 8, 2005 has been entered.

Response to Arguments

3. Applicant's arguments with respect to claims 198, 203-204, 213-214, 216, 219, 220, and 222-223 have been considered but are moot in view of the new ground(s) of rejection.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993), *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ

Art Unit: 3621

761 (CCPA 1982), *In re Vogel*, 422 F.2d 488, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

5. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

6. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 198, 203-204, 213-214, 216, 219, 220, and 222-223 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 5,638,513. Although the conflicting claims are not identical, they are not patentably distinct from each other. Claim 1 of U.S. Patent No. 5,638,513 recites: a method for transferring items having value (software) in a computer network, comprising, a storage computer coupled to the system and remote from the user's terminal(s) a server system with cryptographic capabilities (asynchronous headers which verify license) for transferring the item having value.

8. Claim 1 of U.S. Patent No. 5,638,513 differs since it fails to describe a database for storage of the items having value, and fails to specifically use the term cryptography. Further, U.S. Patent No. 5,638,513 differs in that it describes a method rather than a system as in the instant application. Nevertheless, it is obvious to one of ordinary skill in the art that some type of encryption is necessary

Art Unit: 3621

in order to keep data secure in a license system. Further, databases are old and well known in the art and would be an effective way of storing software or any other digital item having value. With no specific encryption or manner of storage described in claim 1 of U.S. Patent No. 5,638,513 there is no reason not to use a database. The motivation would be to ensure a user-friendly interface, while maintaining data security. Additionally, it is obvious to make a system claim based on a method claim.

9. Examiner's note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may be applied as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Conclusion

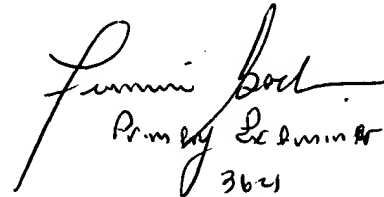

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cristina Owen Sherr whose telephone number is 571- 272-6711. The examiner can normally be reached on 8:30-5:00 Monday through Friday.

11. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on 571-272-6712. The fax
